Experience

CAREERFOUNDRY

Web Development Bootcamp

September 2021 - April 2022

- Developed myFlix app – a movie web application built with MERN. The API uses REST architecture. Bootstrap UI library used for styling and responsiveness.
- Developed Meet app – a serverless PWA built with React using TDD technique. The app uses the Google Calendar API to fetch upcoming events.
- Developed Chat App – a React Native Mobile app providing users with chat interface and options to share images and their location. The app uses Google Firestore Database for storing chat conversations.
- Re-built myFlix app using Angular. The UI was built with Angular Material. The project contains technical documentation using JSDoc.
- Collaborated with other students through Slack and helped with debugging of common projects.

Encore
